# Value Added Course PC Assembly and Instalation

Kannada Sangha Pune's  
Kaveri College of Arts, Science and Commerce, Pune

B.Sc. (Computer Science)

Electronics Department

<b>Name of the Course:</b>	PC Assembly and installation of OS
<b>Eligibility:</b>	12 <sup>th</sup> pass with Physics and Mathematics
<b>Duration:</b>	36 hours
<b>Fees:</b>	Will be announced before starting the course.
<b>Number of students:</b>	60-80 students (in a batch)

#### Objectives of the Course:

1. To learn fundamentals of computer system
2. To learn basic elements of computer system
3. To learn PC assembly
4. Installation of OS

#### Syllabus:

1. Fundamentals of computer system: types, classification, booting, functioning
2. Introduction of Motherboard and its components: SMPS, hard disc, RAM/ROM
3. Introduction to peripherals and add-on cards
4. PC assembling
5. Introduction of various operating systems and its installation

#### Course Outcomes:

1. Students will able to identify various elements of PC
2. Students will learn PC assembling
3. Students will learn installation of OS

# Introduction to Block Chain Technologies

## Course Structure

The screenshot shows the Coursera course page for 'Introduction to Blockchain Technologies'. The course is offered by INSEAD and is part of the Blockchain Revolution Specialization. It has a 4.7 rating from 2,274 reviews and a 97% completion rate. The course is taught by Don Tapscott. The page includes an 'Enroll for Free' button, a search bar, and navigation links for 'About', 'Instructors', 'Syllabus', 'Reviews', 'Enrollment Options', and 'FAQ'. The 'About this Course' section describes the course content, and the 'WHAT YOU WILL LEARN' section lists key topics.

**About this Course**  
52,133 recent views

In this first course of the specialization, we will discuss the limitations of the Internet for business and economic activity, and explain how blockchain technology represents the way forward. After completing this course, you will be able to explain what blockchain is, how it works, and why it is revolutionary. You will learn key concepts such as mining, hashing, proof-of-work, public key cryptography, and the double-spend problem. You'll be able to describe seven design principles for blockchain technology, and the challenges facing the people developing it. You'll also meet the players in the blockchain ecosystem, and consider your own role in stewarding the blockchain revolution.

**WHAT YOU WILL LEARN**

- ✓ The limitations of the Internet for business and economic activity, and how trust is established in a pre- and post-blockchain world
- ✓ Seven design principles for blockchain technology
- ✓ Terms such as miner, hash, nonce, proof-of-work, and public key cryptography, as well as the steps of a blockchain transaction
- ✓ Ten challenges associated with implementing blockchain technology

**Flexible deadlines**  
Reset deadlines in accordance to your schedule.

**Shareable Certificate**  
Earn a Certificate upon completion

**100% online**  
Start instantly and learn at your own schedule.

This screenshot provides more details about the course. It highlights that this is 'Course 1 of 4 in the Blockchain Revolution Specialization' and is at a 'Beginner Level'. The course is '100% online' and takes 'Approx. 29 hours to complete'. It is taught in 'English' with subtitles in multiple languages. A 'Try Coursera for Business' button is also visible.

### Syllabus - What you will learn from this course

Content Rating 97% (7,802 ratings)

WEEK	Duration	Topic
1	7 hours to complete	<p><b>The Second Era of the Internet</b></p> <p>The Internet connects billions of people around the world, and is great for communicating and collaborating online. However, because it was built for moving and storing information, and not value, it has done little to change the way we do business. Now, for the first time in human history, two or more parties anywhere in the world can transact and do business peer to peer using the blockchain. In this module we introduce blockchain as "the trust protocol," and explain how it represents the second era of the Internet. We describe how blockchain technology establishes trust—not through powerful intermediaries, but rather through collaboration, cryptography and clever code.</p> <p>13 videos (Total 60 min), 8 readings, 6 quizzes <a href="#">See All</a></p>
2	6 hours to complete	<p><b>Blockchain Design Principles</b></p> <p>We believe that the next era of the digital economy can be shaped around a set of blockchain design principles, which can be used for creating software, services, reinventing business models, markets, organizations, and even governments. This module frames the blockchain revolution around seven design principles. For each principle we describe a current problem to be solved, identify "blockchain breakthroughs" to these problems, and discuss the implications of these breakthroughs on the digital economy. We hope that these design principles will assist learners in contemplating their roles and their futures in the blockchain revolution.</p> <p>12 videos (Total 69 min), 8 readings, 6 quizzes <a href="#">See All</a></p>

**WEEK 3**

**4 hours to complete**

**Public and Private Ledgers**

The advent of blockchain technology forces us to reconsider the upside and downside of public revelation of transactions and contracts. The implementation, application, and possible regulation of distributed ledgers involve choices that will critically affect information disclosure and economic interactions. Whether the ledger is public and permissionless, such as the Bitcoin or Ethereum blockchains, or private and permissioned, such as the Ripple or Hyperledger implementations, in principle transactions on a blockchain have a high native level of transparency. In this module, you will learn how privacy can be protected in both public and private ledgers using both procedural and technological methods.

13 videos (Total 50 min), 4 readings, 5 quizzes [See All](#)

**WEEK 4**

**3 hours to complete**

**The Blockchain Ecosystem**

Although blockchain technology emerged from the open source community, it quickly attracted many stakeholders, each with different backgrounds, interests, and motives. In this module, you will explore the roles and perspectives of nine categories of stakeholders within the blockchain ecosystem, including industry pioneers, venture capitalists, developers, governments, regulators, leaders, and end users.

**Blockchain Implementation Challenges**

Like every revolutionary technology, the blockchain has its upside and its downside. In this module we discuss ten implementation challenges which must be overcome as we transition to the second era of the Internet. For each challenge, you will also learn about potential solutions and what we can do to ensure the fulfillment of the blockchain's promise.

# System Administration and IT Infrastructure Services

## Course Structure

The screenshot shows the Coursera course page for 'System Administration and IT Infrastructure Services'. The course is offered by Google and is part of the Google IT Support Professional Certificate. It has a rating of 4.7 from 21,284 reviews and a 97% completion rate. The course is available for free, starting in January 2022, with financial aid available. 311,958 students are already enrolled. The course is part of the Bachelor of Science in Computer Science degree. The page includes navigation links for About, Instructors, Syllabus, Reviews, Enrollment Options, and FAQ. The 'About this Course' section describes the course content, which focuses on transitioning from single-computer work to multi-user environments, covering systems administration, cloud infrastructure, and server management. The 'SKILLS YOU WILL GAIN' section lists 'Flexible deadlines', 'Shareable Certificate', and '100% online'. The 'About this Course' section also includes a description of the course content and a 'SHOW ALL' link.

This screenshot shows the same Coursera course page, but with more details visible. The 'SKILLS YOU WILL GAIN' section now includes 'Directory Service', 'Lightweight Directory Access Protocol (LDAP)', and 'Backup'. The 'About this Course' section includes a 'SHOW ALL' link. The 'Flexible deadlines' section includes a 'Reset deadlines in accordance to your schedule.' link. The 'Shareable Certificate' section includes an 'Earn a Certificate upon completion' link. The '100% online' section includes a 'Start instantly and learn at your own schedule.' link. The 'Beginner Level' section includes a 'Beginner Level' link. The 'Approx. 27 hours to complete' section includes an 'Approx. 27 hours to complete' link. The 'English' section includes a 'Subtitles: Arabic, French, Portuguese (European), Italian, Portuguese (Brazilian), Vietnamese, German, Russian, English, Spanish' link. The 'Could your company benefit from training employees on in-demand skills?' section includes a 'Try Coursera for Business' link.

**WEEK 3** 6 hours to complete

**Software and Platform Services**

In the third week of this course, we'll explore software and platform services. We'll cover what types of software and platform services you may encounter in a tech role and how to manage them. We'll learn how to configure email services, security services, file services, print services, and platform services. We'll explore ways to troubleshoot platform services and common issues to look out for. By the end of this module, you'll understand how to setup and manage the IT infrastructure services to help a business stay productive, keep information secure, and deliver applications to its users.

16 videos (Total 45 min), 16 readings, 6 quizzes [See All](#)

**WEEK 4** 7 hours to complete

**Directory Services**

In the fourth week of this course, we'll learn about directory services. Specifically, we'll cover how two of the most popular directory services, Active Directory and OpenLDAP, work in action. We'll explore the concept of centralized management and how this can help SysAdmins maintain and support all the different parts of an IT infrastructure. By the end of this module, you'll know how to add users, passwords, and use group policies in Active Directory and OpenLDAP.

19 videos (Total 100 min), 13 readings, 6 quizzes [See All](#)

**WEEK 5** 3 hours to complete

**Data Recovery & Backups**

In the fifth week of this course, we'll learn about data recovery and backups. In any tech role, it's important to know how to backup and recover data -- it's even more important for system administration. We will also learn about common corporate practices like designing a disaster recovery plan and writing post-mortem documentation. By the end of this module, you'll know the tradeoffs between on-site and off-site backups, understand the value and importance of backup and recovery testing, know different options for data

We will also learn about common corporate practices like designing a disaster recovery plan and writing post-mortem documentation. By the end of this module, you'll know the tradeoffs between on-site and off-site backups, understand the value and importance of backup and recovery testing, know different options for data backup (as well as the risks) and understand the purpose and contents of a disaster recovery plan.

13 videos (Total 43 min), 4 readings, 4 quizzes [See All](#)

**WEEK 6** 24 minutes to complete

**Final Project**

Congratulations, you've made it to the final week in the course! The last week of this course is dedicated to the final project. For the final project, you will apply all the skills you've learned in this course by providing systems administration consultation. You will assess the IT infrastructure of three fictitious (but very real-life based!) companies and provide recommendations and advice about how to support their IT infrastructure. By the end of this project, you will demonstrate the skills and problem-solving techniques of a SysAdmin. Good luck!

# The Global Financial Crisis Course Structure

The screenshot shows the Coursera course page for 'The Global Financial Crisis' offered by Yale. The page features a dark blue header with the Coursera logo and a search bar. Below the header, the course title 'The Global Financial Crisis' is prominently displayed, along with a 4.8 star rating from 2,216 ratings and a 97% approval rate. The instructor, Andrew Metrick, is listed with a link to view more instructors. A large 'Enroll for Free' button is present, with a note that financial aid is available and the course starts on Feb 11. It also states that 118,502 people are already enrolled. Navigation links for 'About', 'Instructors', 'Syllabus', 'Reviews', 'Enrollment Options', and 'FAQ' are visible. The 'About this Course' section is partially visible, showing 36,110 recent views and a 'Flexible deadlines' feature.

This screenshot provides a detailed view of the 'About this Course' section. It includes a description: 'Former U.S. Secretary of the Treasury Timothy F. Geithner and Professor Andrew Metrick survey the causes, events, policy responses, and aftermath of the recent global financial crisis.' Below this, a 'SKILLS YOU WILL GAIN' section lists four skills: Crisis, Global Financial Crisis, Financial Markets, and Financial Crisis. To the right, a list of course features is shown: 'Flexible deadlines' (Reset deadlines in accordance to your schedule), 'Shareable Certificate' (Earn a Certificate upon completion), '100% online' (Start instantly and learn at your own schedule), 'Approx. 64 hours to complete', and 'English' (with subtitles in Arabic, French, Portuguese, Italian, Vietnamese, German, Russian, English, Spanish, and Romanian). A section titled 'Could your company benefit from training employees on in-demand skills?' includes a 'Try Coursera for Business' button. The 'Instructors' section is partially visible at the bottom.

WEEK 4

3 hours to complete

Unit 3: Creating a Business Plan (Part 2)

In this second part of Unit 3, we will learn about the Financials section of a business plan and how to create a simple, brief business plan of our own.

9 videos (Total 36 min), 3 readings, 5 quizzes [See All](#)

WEEK 5

7 hours to complete

Unit 4: Attracting Investors and Obtaining Financial Support

In this unit, we will discuss different ways to get the money needed to start a business. At the end you will create a "pitch" to present your business ideas.

23 videos (Total 74 min), 9 readings, 10 quizzes [See All](#)

# Python Basics

## Course Structure

The screenshot shows the Coursera course page for 'Python Basics'. The page is dark blue with white text. At the top, there's a navigation bar with the Coursera logo and a search bar. Below that, the course title 'Python Basics' is prominently displayed, along with its rating (4.8 stars) and the number of reviews (16,132). The course is offered by the University of Michigan, which is indicated by the 'M' logo and the text 'Offered By UNIVERSITY OF MICHIGAN'. There's also a note that the course is associated with the Master of Applied Data Science degree. A yellow button labeled 'Enroll for Free' is visible, along with the text 'Starts Feb 11' and 'Financial aid available'. The number of enrolled students is shown as 354,643. At the bottom of the page, there are links for 'About', 'Instructors', 'Syllabus', 'Reviews', 'Enrollment Options', and 'FAQ'. The 'About this Course' section is partially visible, showing the course description and a 'Flexible deadlines' feature.

This screenshot provides a more detailed view of the 'Python Basics' course page. The 'About this Course' section is expanded, showing a description: 'This course introduces the basics of Python 3, including conditional execution and iteration as control structures, and strings and lists as data structures. You'll program an on-screen Turtle to draw pretty pictures. You'll also learn to draw reference diagrams as a way to reason about program executions, which will help to build up your debugging skills. The course has no prerequisites. It will cover Chapters 1-9 of the textbook "Fundamentals of Python Programming," which is the accompanying text (optional and free) for this course. The course is for you if you're a newcomer to Python programming, if you need a refresher on Python basics, or if you may have had some exposure to Python programming but want a more in-depth exposition and vocabulary for describing and reasoning about programs. This is the first of five courses in the Python 3 Programming Specialization.' To the right of the text, there are several feature icons and descriptions: 'Flexible deadlines' (Reset deadlines in accordance to your schedule), 'Shareable Certificate' (Earn a Certificate upon completion), '100% online' (Start instantly and learn at your own schedule), 'Course 1 of 5 in the Python 3 Programming Specialization', 'Beginner Level', 'Approx. 35 hours to complete', 'English' (with subtitles in Arabic, French, Portuguese, Italian, Vietnamese, Korean, German, Russian, and Spanish), and 'Could your company benefit from...'. The bottom of the page shows the Windows taskbar with the search bar and system tray.

**UNIVERSITY OF MICHIGAN** Python 3 Programming Specialization Enroll for Free Starts Feb 11

About Instructors **Syllabus** Reviews Enrollment Options FAQ

**WEEK 1** 11 hours to complete

**1** **General Introduction**

In week one you will be introduced to programming in python through lectures and the Runestone textbook - an interactive online textbook built for this course. By the end of the module, you will have run your first python program, and learned how to draw images by writing a program.

27 videos (Total 172 min), 31 readings, 6 quizzes [See All](#)

---

**WEEK 2** 8 hours to complete

**2** **Sequences and Iteration**

In week two you will use the lectures and the Runestone textbook to understand the basics of a few python data types - lists, strings, tuples - as well as a control structure - for loops. By the end of this week, you will be able to write more complex programs that create drawings by incorporating for loops. Finally, we will present the basics of an accumulation pattern to you, which will be expanded on in each week for the rest of the course.

15 videos (Total 88 min), 23 readings, 4 quizzes [See All](#)

---

**WEEK 3** 5 hours to complete

**3** **Booleans and Conditionals**

In week three you will learn a new python data type - the boolean - as well as another control structure - conditional execution. Through the use of video lectures and the Runestone textbook, you will learn what Binary, Unary, Nested, and Chained Conditionals are, as well as how to incorporate conditionals within an accumulation pattern.

7 videos (Total 61 min), 12 readings, 3 quizzes [See All](#)

7 videos (Total 61 min), 12 readings, 3 quizzes [See All](#)

WEEK 4

10 hours to complete

### Sequence Mutation and Accumulation Patterns

In week four we will present deeper knowledge on using lists, strings, and python objects in general. We will also cover how to use the accumulation pattern with lists and with strings. The final assignment will test your knowledge and skills through application, much like previous assessments and assignments did, though with a more difficult set of tasks now that you have learned the basics.

22 videos (Total 92 min), 16 readings, 6 quizzes [See All](#)

---

TOP REVIEWS FROM PYTHON BASICS

by RS Jun 3, 2020  
Amazing course. The ActiveCode and CodeLens helped me a lot with the problems in Python. The concepts were explained very well and I developed a great liking to Python! I can't wait to learn more!

by A Oct 28, 2020  
I have no reason to rate it a star less than 5! The practice exercises and modes of teaching were on point. Also enjoyed the jokes at the end of each section (lol). Sending love and light from here.

# Economics of Money and Banking

## Course Structure

The screenshot shows the Coursera course page for 'Economics of Money and Banking' offered by Columbia University. The page features a blue header with the course title and university logo. Below the header, there is a navigation bar with 'About', 'Instructors', 'Syllabus', 'Reviews', 'Enrollment Options', and 'FAQ'. The main content area includes a 'Browse' path (Social Sciences > Economics), the course title, a 4.9 star rating with 1,435 ratings and a 97% approval rate, and the instructor's name, Perry G. Mehrling. A prominent 'Enroll for Free' button is displayed, along with a note that financial aid is available and that the course starts on Feb 11. It also states that 145,076 people are already enrolled.

This screenshot shows the 'About this Course' section. It begins with the text 'About this Course' and '95,021 recent views'. The main text describes the course's focus on the evolution of the modern monetary system, particularly in light of the 2007-2009 financial crisis. It highlights three key features of the new system: the intertwining of capital and money markets, the global character of the crisis, and the need for international cooperation. A 'SHOW ALL' link is provided. To the right, a list of course features is presented with icons: 'Flexible deadlines' (Reset deadlines in accordance to your schedule), 'Shareable Certificate' (Earn a Certificate upon completion), '100% online' (Start instantly and learn at your own schedule), 'Approx. 33 hours to complete', and 'English' (with subtitles in Arabic, French, Portuguese, Italian, Vietnamese, German, Russian, Spanish, and Japanese). At the bottom, there is a section titled 'Could your company benefit from training employees on in-demand skills?' with a 'Try Coursera for Business' button.

[FAQ](#)

**1** Introduction  
 The first two lectures paint a picture of the monetary system as the essential infrastructure of a decentralized market economy. The second lecture, "The Natural Hierarchy of Money", is a kind of high-level overview of the entire course, so don't expect to fully understand it until you look back after completing the rest of the course. Nevertheless it provides essential orientation for what comes after. Lectures notes for these and subsequent lectures may be found in the very first segment of this module.  
 12 videos (Total 124 min), 2 readings [See All](#)

**WEEK**  3 hours to complete

**2** Introduction, continued  
 The next two lectures are meant to introduce a key analytical tool, the balance sheet approach to monetary economics, that we will be using repeatedly throughout the course. As inspiration, first I provide a concrete example of how the approach works by "translating" the Allyn Young reading into the balance sheet language. I follow that with a more systematic introduction to this essential tool.  
 20 videos (Total 130 min), 1 reading, 1 quiz [See All](#)

**WEEK**  3 hours to complete

**3** Banking as a Clearing System  
 In the next four lectures, we build intuition by viewing banking as a payments system, in which every participant faces a daily settlement constraint (a survival constraint). From this point of view, the wholesale money market plays a key role by allowing banks to relax the discipline of a binding settlement constraint, delaying final payment by putting settlement off until a later date. The relative importance of the various money markets has changed since the 2008 crisis--Fed Funds is now less important--but the conceptual framework remains valid, indeed not only for dollar money markets but also for non-dollar money markets.  
 20 videos (Total 125 min), 1 reading, 1 quiz [See All](#)

[About](#) | [Instructors](#) | [Syllabus](#) | [Reviews](#) | [Enrollment Options](#) | [FAQ](#)

**WEEK 4**

3 hours to complete

**Banking as a Clearing System, continued**

The next two lectures extend the payments system frame to non-banks by bringing in repo markets, and to the international monetary system by bringing in Eurodollar markets. Here, as in the previous two lectures, the emphasis is on settlement, and so implicitly on so-called "funding liquidity". The last three segments of the Eurodollar lecture, on the failure of two seemingly obvious arbitrage conditions, are meant to motivate the shift to market-making and "market liquidity" in the next module.

20 videos (Total 131 min), 1 reading, 1 quiz [See All](#)

---

**WEEK 5**

3 hours to complete

**Banking as Market Making**

"Market liquidity" is supplied by dealers who stand ready to absorb temporary imbalances in supply and demand by taking the imbalance onto their own balance sheets, for a price. From this point of view, banks can be considered a special kind of dealer, since they absorb imbalances in payment flows. The first lecture is meant to build intuition by using our familiar balance sheet method to make sense of how this all worked in a system much simpler than our own. The second lecture introduces a formal model of the economics of the dealer function, which we will be using throughout the rest of the course.

16 videos (Total 114 min), 1 reading, 1 quiz [See All](#)

---

**WEEK 6**

3 hours to complete

**Banking as Market Making, continued**

Here we adapt the Treynor model to banks, which we conceptualize as dealers in money, specifically term funding. Like Treynor's security dealers, banks supply market liquidity for a price. But sometimes, in a financial crisis, demand for market liquidity overwhelms supply, and that's where the central bank comes in, as dealer of last resort in money markets. And if the crisis is big enough, as 2007-2009, the central bank comes in as dealer of last resort in capital markets as well.

**WEEK 7**

2 hours to complete

**Midterm review and exam**

The first twelve lectures have introduced all of the main concepts of the course. The midterm exam gives you a chance to test whether you have mastered these concepts before extending them into new areas in the second part of the course. But before you try the exam, first use the review lecture, and the questions from students, to review the main concepts.

10 videos (Total 64 min) [See All](#)

---

**WEEK 8**

3 hours to complete

**International Money and Banking**

The next four lectures extend the "money view" perspective to the larger world of multiple national monies by thinking about the international monetary system as a payment system, and by thinking of banks as market makers in foreign exchange. The first lecture is introductory and conceptual, while the second builds intuition by "translating" Mundell's account of the development of the international monetary system into money view language (similar to what we did at the beginning of the course for Allyn Young's account of the development of the US monetary system).

18 videos (Total 136 min), 1 reading, 1 quiz [See All](#)

---

**WEEK 9**

3 hours to complete

**International Money and Banking, continued**

The next two lectures use the Treynor model to understand how exchange rates are determined in dealer markets. In the second, we confront directly the puzzle we observed earlier in the course, namely why uncovered interest parity (UIP) fails to hold in real world markets.

3 hours to complete

**Banking as Advance Clearing**

The next four lectures extend the money view to the larger financial world of capital markets, where the price of risk is determined in dealer markets for swaps of various kinds. The first lecture is a kind of conceptual introduction, while the second translates the standard finance account of forwards and futures into money view terms, as key building block for what comes after.

19 videos (Total 135 min), 1 reading, 1 quiz [See All](#)

---

**WEEK**  
**11**

3 hours to complete

**Banking as Advance Clearing, continued**

In the modern economy, the price of risk is determined in swap markets that distinguish specific forms of risk, most importantly interest rate swaps and credit default swaps. The Treynor model can be adapted to understand how the price of risk is formed in dealer markets.

19 videos (Total 131 min), 1 reading, 1 quiz [See All](#)

---

**WEEK**  
**12**

3 hours to complete

**Money in the Real World**

In this final module, we bring the entire course together. These two lectures build on everything that came before, and show how all the pieces fit together into a unified whole. Specifically, the first lecture uses the conceptual apparatus of the money view to make sense of shadow banking as the quintessential form of banking for the modern financially globalized world. And the second lecture shows how the conceptual apparatus of the money view fits with standard economics view and finance view, by drawing attention to dimensions of the world from which the standard views abstract.

**13**

1 hour to complete

**Final Exam**

The previous module operated in effect as a review of the entire course, so if you were able to make sense of those lectures, you are ready for the final. But maybe you first want to have a look back at the second lecture, "The Natural Hierarchy of Money", for a high-level summary of the essential concepts of the money view. For almost everybody, the money view is a new and refreshing way of thinking about the world, and it is a little bit of a shock to see how the money view fits with standard economics and finance. The previous module was designed to show how the money view fits with standard economics and finance.

# Moral Foundations of Politics

## Course Structure

The screenshot shows the Coursera course page for 'Moral Foundations of Politics' offered by Yale University. The course is part of the 'Governance and Society' track. It has a rating of 4.9 stars from 5,313 reviews and a 97% completion rate. The course starts on February 11 and is available for free enrollment. The instructor is Ian Shapiro. The page includes navigation links for 'About', 'Instructors', 'Syllabus', 'Reviews', 'Enrollment Options', and 'FAQ'. The 'About this Course' section highlights 'Flexible deadlines' and a 'Shareable Certificate'. The Windows taskbar at the bottom shows the date as 11-02-2023 and the temperature as 34°C.

This screenshot provides a detailed view of the 'About this Course' section. It includes the following text:  
**About this Course**  
129,151 recent views  
When do governments deserve our allegiance, and when should they be denied it?  
This course explores the main answers that have been given to this question in the modern West. We start with a survey of the major political theories of the Enlightenment: Utilitarianism, Marxism, and the social contract tradition. In each case, we begin with a look at classical formulations, locating them in historical context, but then shift to the contemporary debates as they relate to politics today.  
Next, we turn to the rejection of Enlightenment political thinking, again exploring both classical and contemporary formulations. The last part of the course deals with the nature of, and justifications for, democratic politics, and their relations to Enlightenment and Anti-Enlightenment political thinking.  
In addition to exploring theoretical differences among the various authors discussed, considerable attention is devoted to the practical implications of their competing arguments. To this end, we discuss a variety of concrete problems, including debates about economic inequality, affirmative action and the distribution of health care, the limits of state power in the regulation of speech and religion, and difficulties raised by the emerging threat of global environmental decay.

Key features listed on the right include:  
**Flexible deadlines**: Reset deadlines in accordance to your schedule.  
**Shareable Certificate**: Earn a Certificate upon completion.  
**100% online**: Start instantly and learn at your own schedule.  
**Approx. 45 hours to complete**  
**English**: Subtitles: Arabic, French, Portuguese (European), Italian, Vietnamese, Korean, German, Russian, English, Spanish, Romanian.  
**Could your company benefit from training employees on in-demand skills?** (with a 'Try Coursera for Business' button)

# Introductory Human Physiology

## Course Structure

The screenshot shows the top portion of the Coursera course page. At the top, there is a navigation bar with the Coursera logo, an 'Explore' dropdown, a search bar with the text 'What do you want to learn?', and links for 'Online Degrees', 'Find your New Career', 'For Enterprise', 'For Universities', 'Log In', and 'Join for Free'. Below this, the course title 'Introductory Human Physiology' is displayed in large white text on a dark blue background. To the right, it says 'Offered By Duke UNIVERSITY' with the Duke logo. Underneath the title, there are 4.8 stars from 4,558 ratings and a 97% approval rating. The instructor is listed as Jennifer Carbrey with a link to '+1 more instructor'. A prominent 'Enroll for Free' button is shown, along with 'Financial aid available' and 'Starts Feb 11'. Below the button, it states '434,650 already enrolled'. At the bottom of this section, there are links for 'About', 'Instructors', 'Syllabus', 'Reviews', 'Enrollment Options', and 'FAQ'. The 'About this Course' section is partially visible, showing '149,051 recent views' and a 'Flexible deadlines' icon.

This screenshot shows the detailed 'About this Course' section of the Coursera page. The course title and '149,051 recent views' are repeated. A short description states: 'In this course, students learn to recognize and to apply the basic concepts that govern integrated body function (as an intact organism) in the body's nine organ systems.' Below this, a box titled 'SKILLS YOU WILL GAIN' contains four tags: 'Metabolic Pathways', 'Biology', 'Organ Systems', and 'Medicine'. To the right, a list of course features is presented with icons: 'Flexible deadlines' (Reset deadlines in accordance to your schedule), 'Shareable Certificate' (Earn a Certificate upon completion), '100% online' (Start instantly and learn at your own schedule), 'Approx. 33 hours to complete', and 'English' (Subtitles: Arabic, French, Portuguese (European), Chinese (Simplified), Italian, Portuguese (Brazilian), Vietnamese, Korean, German, Russian, English, Spanish). A checkmark icon is next to the text 'Could your company benefit from training employees on in-demand skills?'. At the bottom right, there is a 'Try Coursera for Business' button. The Windows taskbar at the bottom shows the time as 12:39 on 11-02-2023.

About Instructors Syllabus Reviews Enrollment Options FAQ

**WEEK 3** 3 hours to complete

### The Senses and the Somatic Nervous System

In this module, we consider two types of cells: one that relays information to the central nervous system (brain) for interpretation and a second set, motor neurons which relay information away from the central nervous system to govern voluntary movement. The input pathway to the brain is mediated by specific cells called senses. The senses convert external stimuli into electrical signals that are processed by the brain. The brain then processes this information for interpretation and then sends out signals to the muscles to govern voluntary movement.

**WEEK 4** 3 hours to complete

### Muscle

In this module, we consider the effectors of the body that govern voluntary and involuntary movement. These effectors are specialized cells called muscle which are capable of generating force (tension). Muscle cells are classified as one of three types: skeletal, smooth, and cardiac. Although all three types generate tension, each is specialized for a given function. Skeletal muscle is attached to the bones and is used for movement of the body. Smooth muscle is found in the walls of internal organs and is used for involuntary movement. Cardiac muscle is found in the heart and is used for pumping blood.

**WEEK 5** 4 hours to complete

### Cardiovascular System

Welcome back! In this module we consider how the circulatory system works to deliver oxygen and nutrients to the specific organs. We start with a discussion of the electrical and mechanical functions of the heart which enable it to generate a pressure gradient. This pressure gradient propels the blood through the blood vessels, in a unidirectional manner. The following section considers the structure and function of the blood and the role of the blood in the transport of oxygen and nutrients to the organs and the removal of waste products.

### Respiratory System

We hope that you are enjoying the course! This module considers the respiratory system. In these lessons, we explore topics such as how we get air into our lungs, the role of airway resistance in ventilation, the transport of oxygen and carbon dioxide between the lungs and tissues, and the regulation of breathing. There are a couple of demonstrations of lung function.

**WEEK 7** 4 hours to complete

### The Endocrine System

In this module, we return our attention to the endocrine system and its role in the maintenance of homeostasis. In particular, we consider the hypothalamus-pituitary axis, which integrates signals from the nervous system and from the blood to regulate most homeostatic functions, including growth, ion balance, fluid balance, response to stress, and energy use. The following section considers the structure and function of the endocrine system and the role of the endocrine system in the regulation of the body's internal environment.

# Successful Negotiation

## Course Structure

The image shows a screenshot of a Coursera course completion page and a corresponding University of Michigan certificate. The Coursera page on the left indicates the course was completed by Vaishnavi Kulkarni on March 23, 2022, with a grade of 97.77%. The certificate on the right is from the University of Michigan, awarded to Vaishnavi Kulkarni for completing the course 'Successful Negotiation: Essential Strategies and Skills'. Handwritten notes in blue ink are present: '9A' at the top right, 'DZ 11/6' next to it, '= 64 hrs' next to the course duration, and '101 173 9A' written vertically on the right side of the certificate.

# American Contract Law II

## Course Structure

The screenshot shows the Coursera course page for "American Contract Law II" offered by Yale. The page features a dark blue header with the course title and "Offered By Yale". Below the title, there are 4.9 stars from 201 ratings and a 97% completion rate. The instructor is Ian Ayres. A prominent "Enroll for Free" button is visible, along with a note that financial aid is available and that 13,094 people are already enrolled. Navigation links for "About", "Instructors", "Syllabus", "Reviews", "Enrollment Options", and "FAQ" are provided. A "Flexible deadlines" feature is highlighted, allowing users to reset deadlines. The Windows taskbar at the bottom shows the date as 11-02-2023 and the time as 12:20.

This screenshot displays the "About this Course" section. It includes a course description: "Contracts I & II provides a comprehensive overview of contract law in the United States. The course covers most of the key concepts found in a first year law school class. Each lecture is based on one or more common-law cases, integrating legal doctrines with policy discussions. The course also covers key sections from the Uniform Commercial Code (UCC), which governs the sale of goods. By the end of the course, the learner should be able to understand: Formation defenses; how an otherwise valid contract can be void, including the statute of frauds, mistake, misrepresentation, duress, unconscionability, and illegality. Performance; the scope and content of a contractual obligation, including conditions, the duty of good faith, and the impracticability defense. Remedies; the types of available remedies for a breach of contract, including various types of money damages and injunctive relief." A list of course features is shown on the right: Flexible deadlines, Shareable Certificate, 100% online, Beginner Level, Approx. 39 hours to complete, and English subtitles in French, Portuguese, Russian, English, and Spanish. The Windows taskbar at the bottom shows the date as 11-02-2023 and the time as 12:23.

**Introduction and Basic Principles**

Welcome to your first week in Microeconomics Principles! As you will quickly see, the things you learn in this class will probably help you see the world in a different way. Economics is not just about money, as you may have incorrectly assumed. On the contrary, as you will learn in this lesson, economics is about how society distributes scarce resources. And, since almost anything in the world is a scarce resource, from fossil fuels to suitable romantic partners, we can apply the rules of economics to pretty much anything.

**WEEK 3** 3 hours to complete  
**Market Efficiency and Government Policies**  
 Welcome to Week 3! Last module we introduced the supply and demand model to explain how free markets work. One of the main concepts we learned about free markets was that they tend to gravitate toward an "equilibrium" price and quantity. This module we will use the same conceptual model to answer one important question: Are free markets the best way to distribute society's resources?  
 10 videos (Total 67 min), 1 reading, 1 quiz [See All](#)

**WEEK 4** 3 hours to complete  
**Elasticities**  
 Welcome to the fourth week! This module we will cover one of my favorite economics concepts: elasticity. It is one of my favorites because of how useful it is to analyze policy implications, as well as its usefulness for business managers. This will be obvious to you when you read one of the discussion topics for this module: Should we legalize marijuana?  
 14 videos (Total 89 min), 1 reading, 1 quiz [See All](#)

**WEEK 5** 3 hours to complete  
**Production and Costs**  
 Welcome to your fifth week! This module we will begin covering the theory of the firm, which will take us basically three modules to finish. Economists call this section of the course, "The Economics of the Lemonade Stand." And that title makes perfect sense, since the concepts we cover can be used by anyone, from someone owning a lemonade stand, to a car manufacturing company, to a hair salon, to a burrito stand, etc.

WEEK 7

3 hours to complete

Firms with Market Power

So, why is it that when you fly the person sitting next to you in the plane probably paid a different price for the ticket than what you paid for it? And why does Starbucks charge so much for its coffee even though you can buy coffee at Dunkin' Donuts for almost half of that price? This module we are finishing our discussion of the firm by focusing on cases that should be more familiar to you than the perfect competition examples we have been using.

10 videos (Total 79 min), 1 reading, 1 quiz [See All](#)

WEEK 8

4 hours to complete

Public Goods, Common Resources, and Externalities

And so we have arrived at the last week. This course has gone too fast! This module we will be discussing market failures. A market failure is a situation when the market does not do a good job of distributing resources among members of society. In fact, in all of these cases the market is the problem.

My main goal is to show you the way economists think and how to use this analytical system to answer questions related not only to these and other important human issues but to anything you end up doing with your life after this class. After all, as you will quickly find out, I believe that everything is economics!
